US DEPARTMENT OF VETERANS AFFAIRS AUTHORITY TO OPERATE  
FOR THE  
PLATEAU BASELINE LEARNING MANAGEMENT SYSTEM

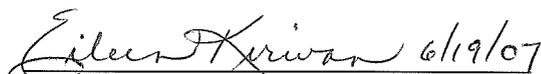

The certification and accreditation for the Plateau Learning Management System (LMS) has been approved as of August 7, 2006, in accordance with the Federal Information Security Management Act (FISMA) of 2002 and OMB Circular A-130, Appendix III. Agency implementations require implementation reviews to ensure compliance with established security requirements. Required documentation including the System Security Plan, Memorandum of Understanding, Interconnection Service Agreement, and Privacy Impact Assessment have been appended to the Baseline Plateau C&A package to reflect Agency-specific security controls on behalf of US Department of Veterans Affairs (VA).

Based on the results of the VA implementation review, it has been determined that current security controls provide adequate Information Assurance Controls required by the Office of Personnel Management and assigned to the GoLearn Learning Management System (LMS). The VA implementation is granted an Authority to Operate (ATO), valid no more than three years or upon expiration of the Baseline C&A or initiation of a major system change, as defined by OPM and GoLearn.

IT Security is an ongoing, iterative, technical, and business process. Coordination with the GoLearn IT Security staff and Operations team is a requirement and will ensure that this system remains compliant. We appreciate your dedication as part of our extended IT Security Team.

Approval is not recommended.

GoLearn System Owner (Acting)
